Naturopathic Medicine is the treatment and prevention of disease by natural means. Naturopathic Doctors assess the whole person, taking into consideration physical, mental, emotional and spiritual aspects of the individual. The following outlines the therapies we may utilize:

Individual diets and nutritional supplements are recommended to address deficiencies, treat disease processes, and promote health.

Botanical medicine is a plant-based medicine that involves the use of herbal teas, tinctures, capsules, and other forms of herbal preparations for the treatment of illness and disease.

Homeopathy is a form of medicine based on the use of tiny doses of the very thing that causes symptoms in healthy people. These minute doses of plant, animal, or mineral origins are used to stimulate the body's ability to heal itself.

Asian medicine includes the use of acupuncture, Eastern herbs and dietary changes to eliminate disease and balance body functions. Acupuncture refers to the insertion of sterilized disposable needles through the skin into underlying tissues at specific points on the body. Eastern herbs may be given in the form of pills, tinctures, or decoctions (strong teas) to be taken internally.

Physical medicine refers to the use of hands-on techniques such as soft tissue work and spinal manipulation.

Hydrotherapy refers to the use of hot/cold water applications to improve circulation and stimulate the immune system.

Lifestyle counseling involves identifying risk factors and making recommendations to help optimize one's physical, mental and emotional environment.

During your initial visits, your Naturopathic Doctor will take a thorough case history and perform a basic/complaint-oriented physical examination, and when indicated, take blood and urine samples.

Even the gentlest therapies may cause complications in certain physiological conditions. This depends greatly on the individual and the extent of the illness. It is very important, therefore, that you inform your Naturopathic Doctor immediately of any disease process that you are suffering from, as well as any medications (prescription or over-the-counter) that you are taking. If you are pregnant, suspect you are pregnant, or you are breast-feeding, advise your doctor immediately.

Health risks associated with Naturopathic Medicine include but are not limited to:

- Aggravation of pre-existing symptoms during the healing process.
- Allergic reactions to supplements or herbs.
- Pain, bruising or injury from venipuncture or acupuncture.
- Fainting or puncturing of an organ with acupuncture needles.
- Muscle strains and sprains or disc injuries from spinal manipulation.
